# File transfer SD card with Android phone

Required items:
- A phone with Android operating system (at least version 8.0)
- Cable USB C Male to USB A Female
- Sd card
- Sd card reader (USB)

STEP 1

- Insert the sd card into the sd card reader provided with the inspection system. Use a connector (USB C Male to USB A Female) to connect the phone and the SD card reader.

- Unlock your phone and go to the "**application overview**".

- Search for the "**files**" application in the indicated search bar.

STEP 2

- Go to the "My files" application that will appear (see the marked green box).
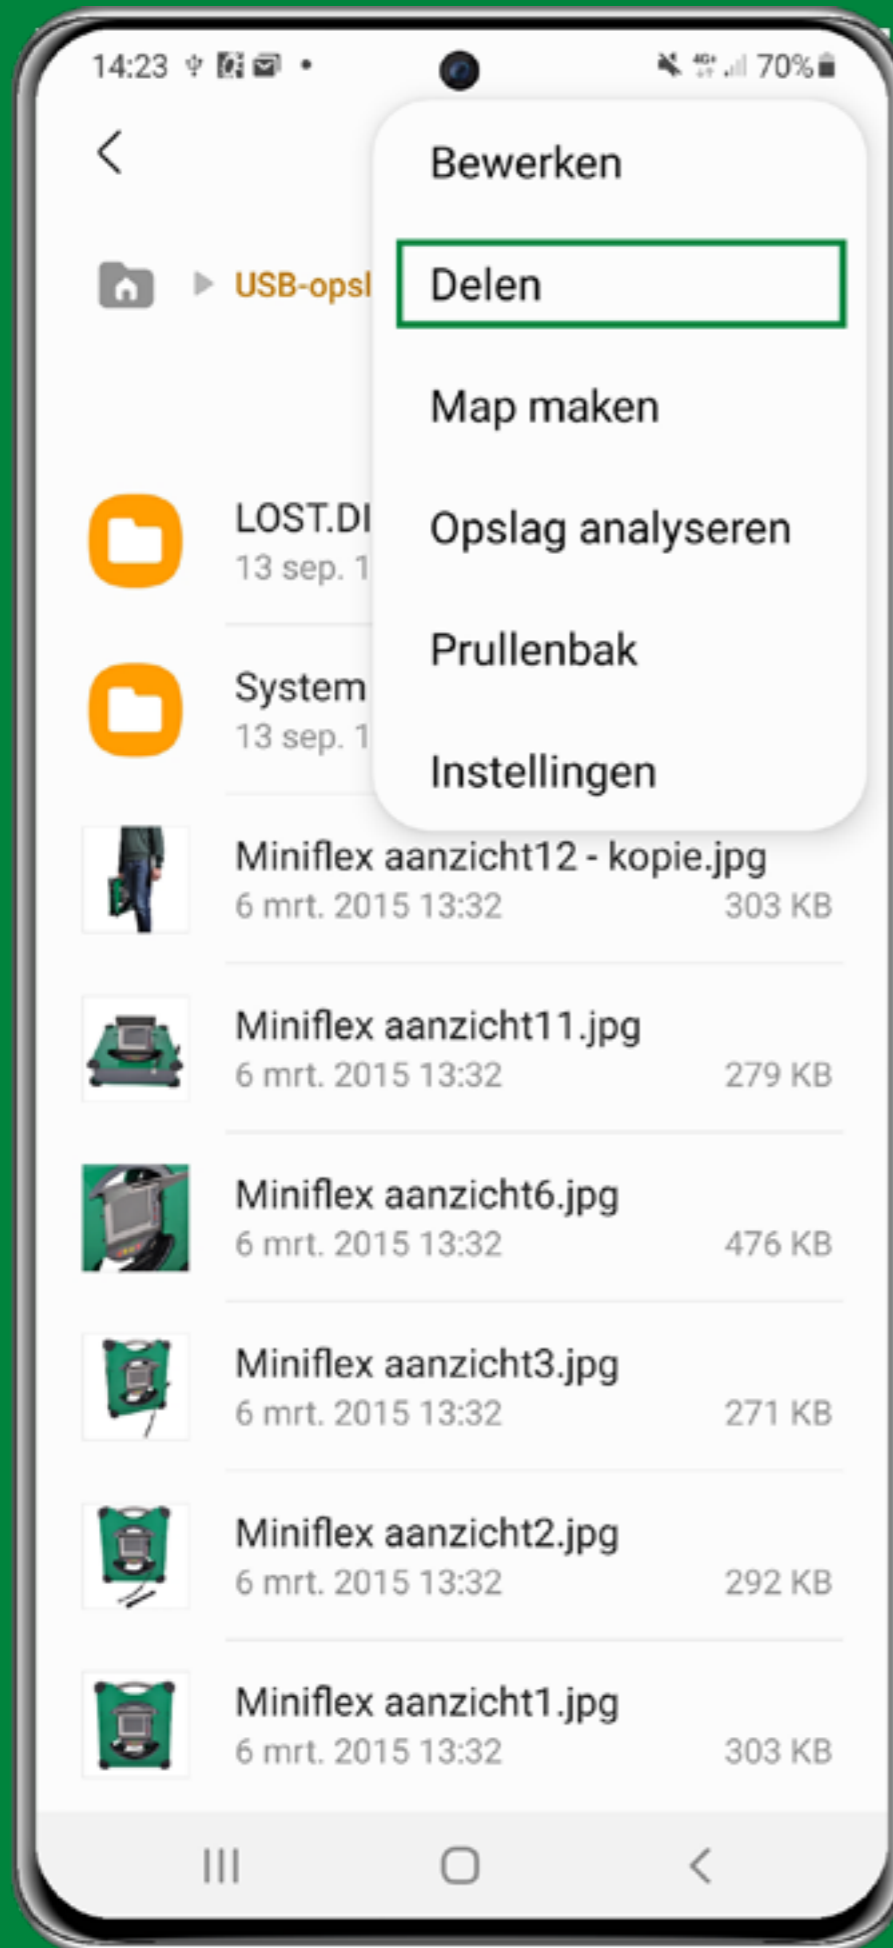

STEP 3

- Now go to **"USB Storage"**. The name of the sd card depends on your phone and sd card. Search for the right sd card. It You may have to scroll down.
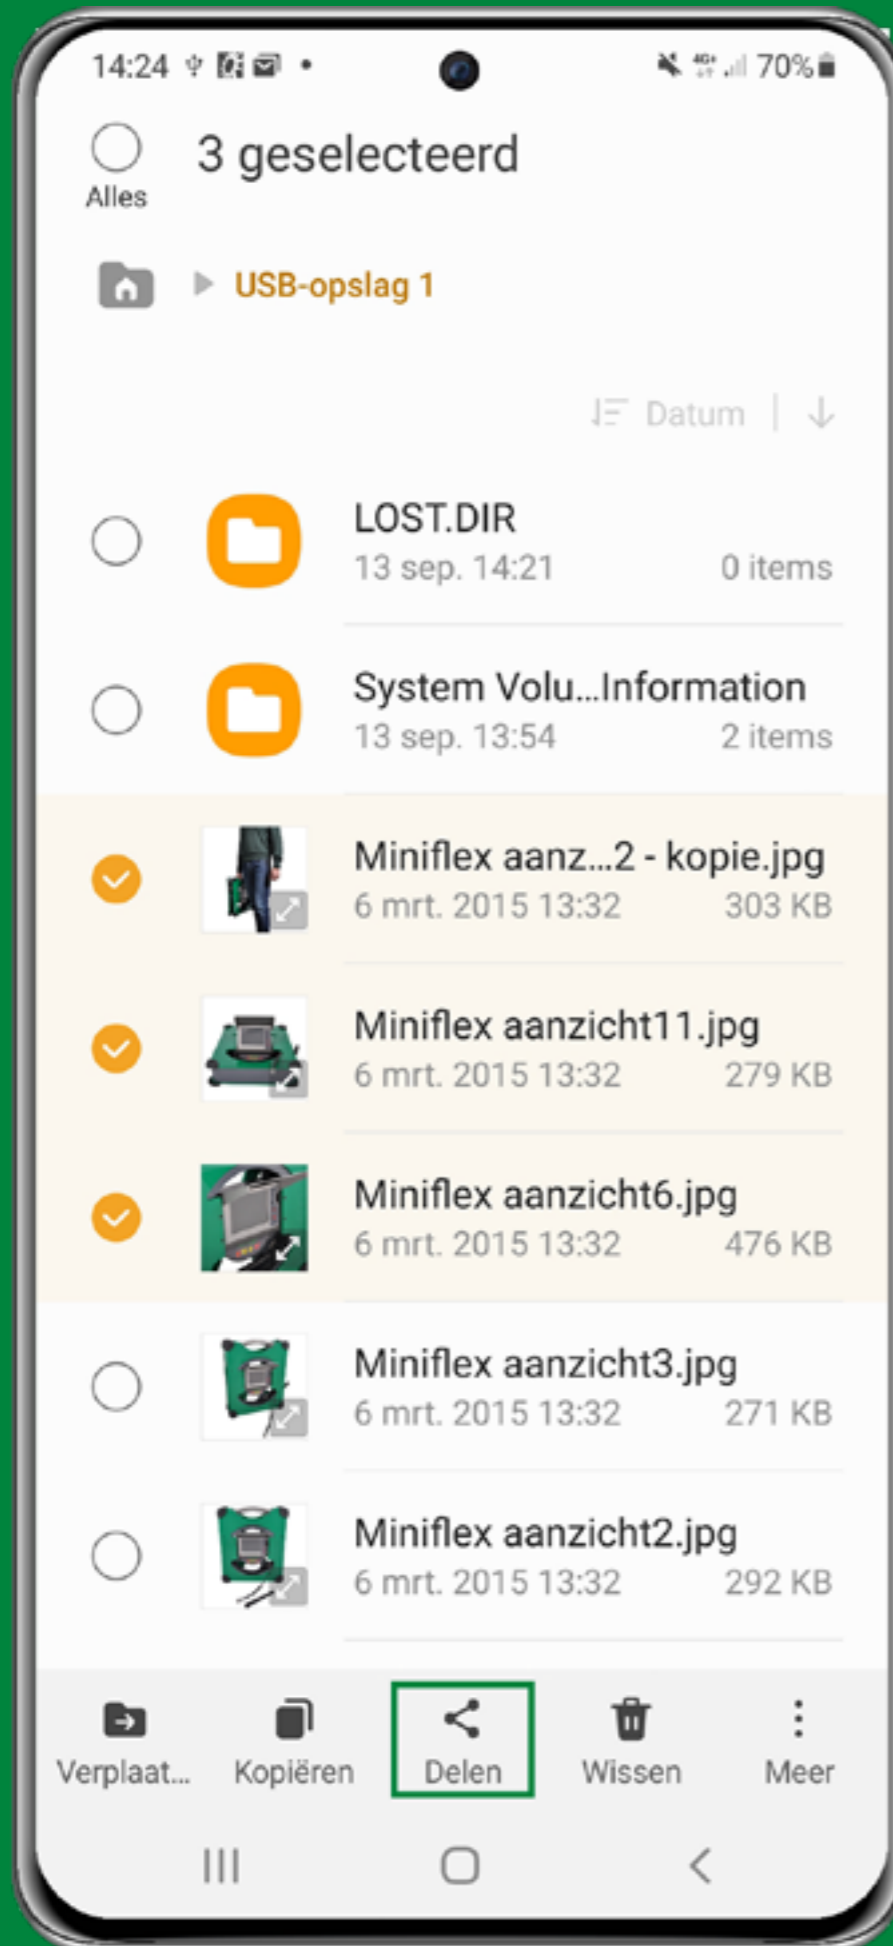

STEP 4

- Here you can see all the files that are on the SD card.

- Open the menu by clicking on the **"three dots"** at the top right of the screen.
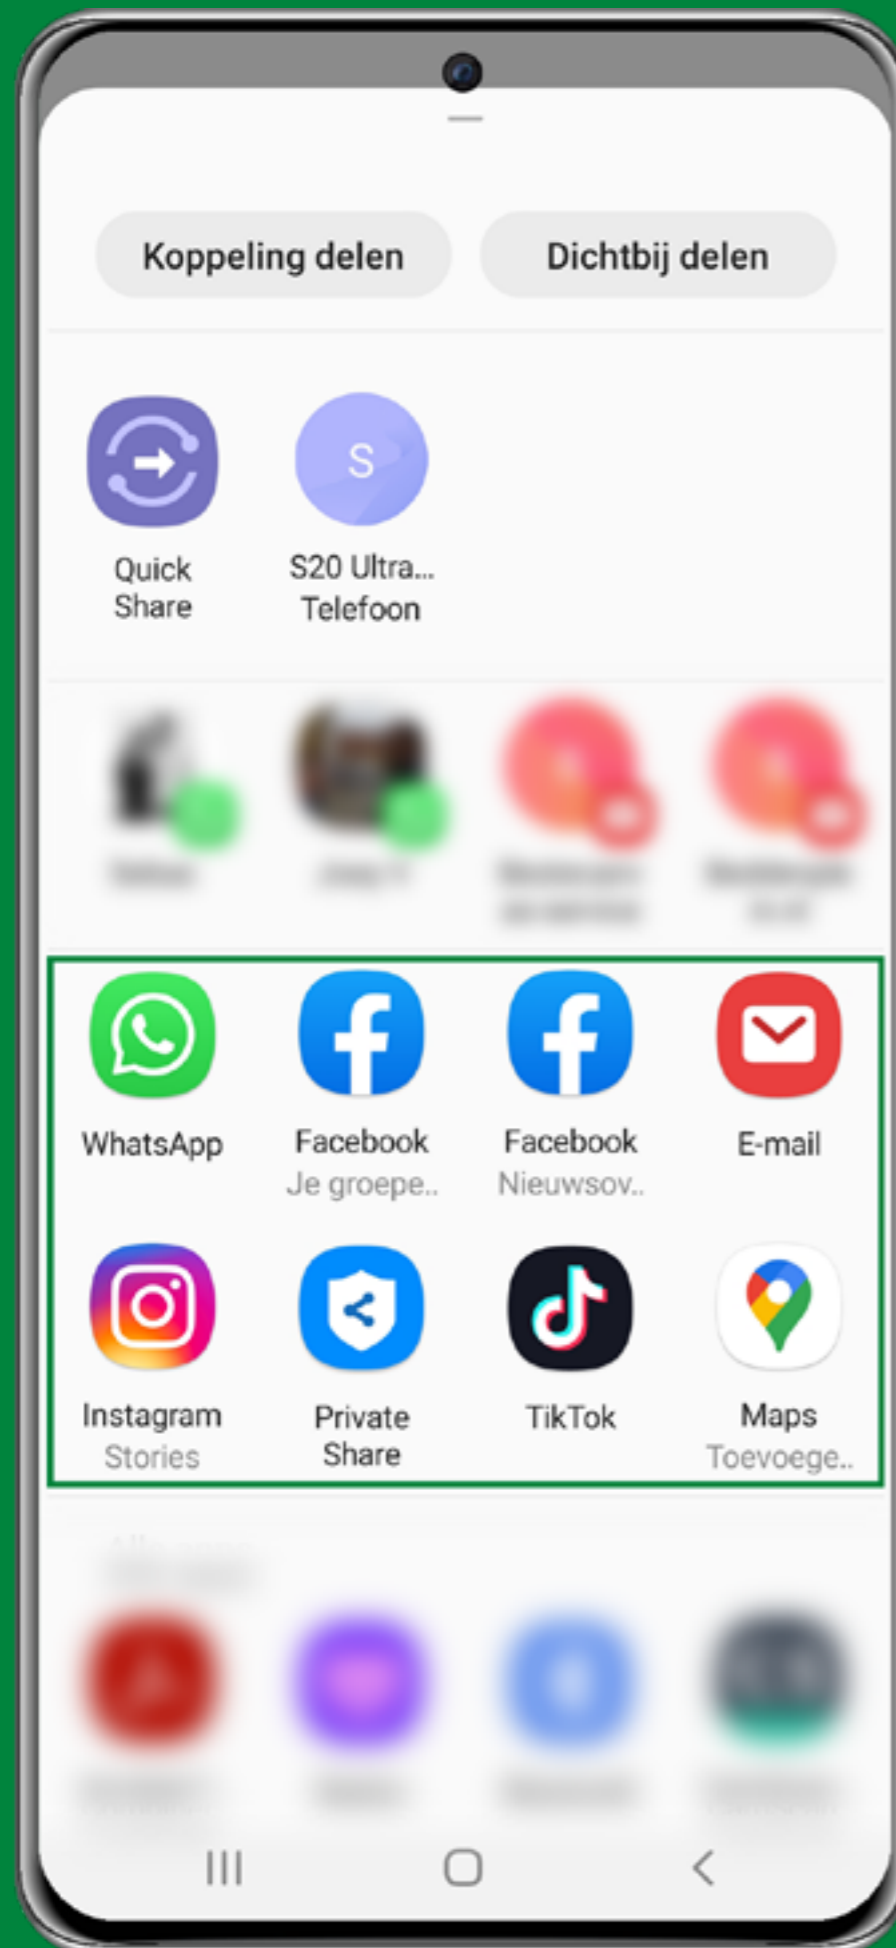

STEP 5

- Choose "Share". This will give you the option to select the files of your choice.

STEP 6

- Select the image you wish to send.

- Then click on '**Share**' at the bottom of the screen in the centre of the indicated green frame.

STEP 7

- Choose the application that you want to use to send the files to another device (see green square). Scroll down for more application options.

- Now follow the steps of the application in question, such as WhatsApp or mail and send the files.
